DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to mobile medical workstation, classified in class 280, subclass 47.35.
- II. Claims 15-20, drawn to a method for reconfiguring a medical workstation, classified in class 312, subclass 294.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used in a materially different process, for instance, the equipment for a particular patient does not need to be determined and can be configured without the need of outside equipment.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Darcell Walker on 1/3/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3618

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
